PROFESSIONAL SUMMARY

Web Developer with 3 months of professional experience at Rex Technologies and hands-on experience building web applications. Skilled in HTML5, CSS3, JavaScript (ES6+), React.js, Tailwind CSS, and Bootstrap, with experience in backend development using Node.js and Express.js and working with MySQL databases. Interested in developing responsive, user-friendly web applications and contributing to reliable software solutions.

WORK EXPERIENCE

Web Developer — Aug 2026 to Present

Rex Technologies

- Built and updated responsive web interfaces using HTML, CSS, JavaScript, and React.js.
- Utilized Tailwind CSS and Bootstrap to design consistent layouts across multiple screen sizes.
- Gained exposure to Node.js backend integration and standard web development workflows.
- Collaborated on project tasks focusing on performance, usability, and UI consistency.

SELECTED PROJECTS

- **ShopHub (E-commerce Platform):** Developed a responsive online shop featuring product categories, variant selection, and order management using React.js and Node.js.
- **Student Skill Tracker:** Designed and built a platform for students to track skill progression, manage portfolios, and present achievements.
- **Pizza Delivery Concept**: Created a web interface for menu browsing and online food ordering.
- **Personal Portfolios:** Built 3 custom portfolio applications showcasing UI layouts, animations, and clean code practices.
